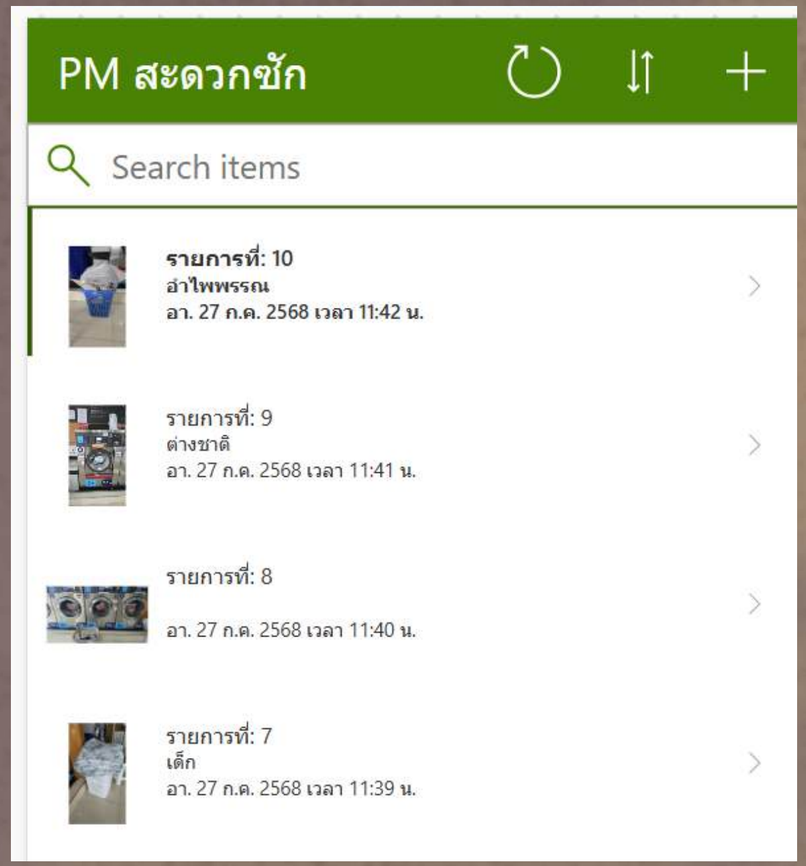
LAUNDRY ORDER
APP

Introduction

This project is a simple form for a laundry service. It helps staff collect customer orders, including laundry types and payment status. The form is built with Power Apps and connected to SharePoint List to store data and track progress.

Browse Screen



1. Order Number
Each item shows running number.

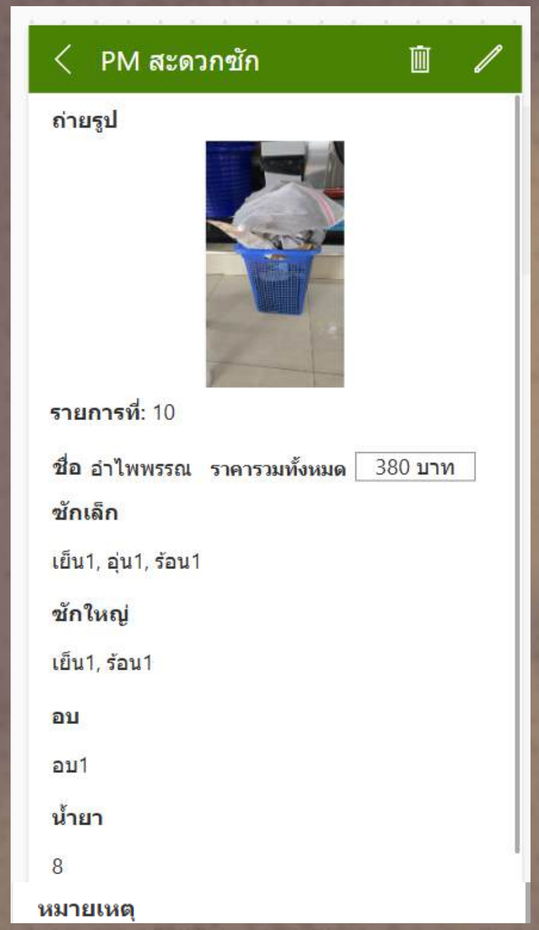
2. Customer Name

3. Order Date
sorted by date in descending order (newest orders appear at the top).

4. Photo
required field. Users must take a photo before submitting the form. If no photo is added, submission is not allowed.

Tools: Power Apps + SharePoint List

Detail Screen



Total Price: automatically calculates the cost based on selected services.
Example ---> Criteria

🪣 Small Wash:
- Cold = 40 THB
- Warm = 50 THB
- Hot = 60 THB

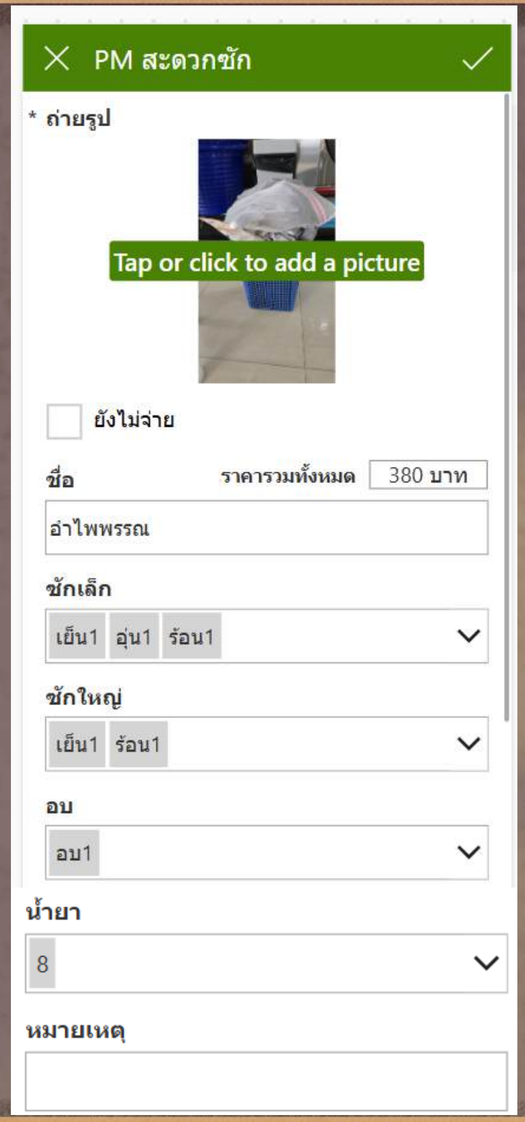
🪣 Large Wash:
- Cold = 60 THB
- Hot = 80 THB

🔥 Dry:
- Each = 50 THB

🧴 Detergent:
- 8 pieces × 5 THB = 40 THB

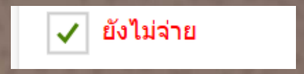
1. Total Price: 40+50+60+60+80+50+40 = 380 THB
2. Note for adding comments.

Tools: Power Apps + SharePoint List

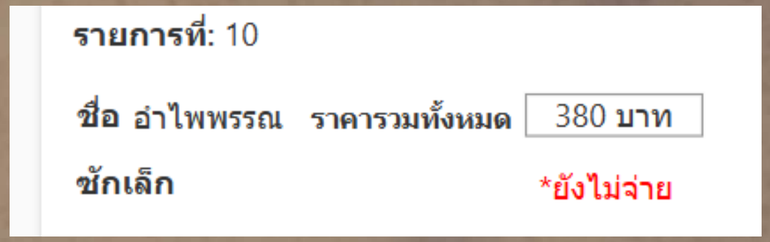


Edit Screen

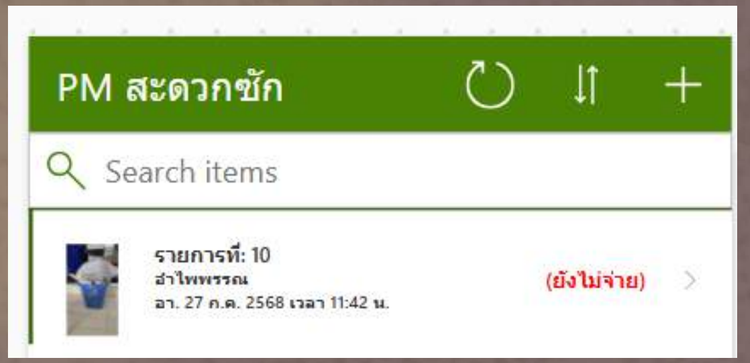
1. Checkbox for Payment:
If checked, it shows "Unpaid" in red.



Detail Screen



Browse Screen



2. Dynamic Total Price
The total price updates automatically based on the services selected (e.g., small wash, large wash, drying, detergent).
